- 5 minute penalty LockOut upon entry of 4 incorrect codes
- SureLock battery compartment for easy battery replacement, without removing the entrypad from the safe door

TOYOTA PROXIMITY SOLUTION FROM ADVANCED DIAGNOSTICS

NEW

SMART Pro™

This major new release from Advanced Diagnostics now gives SMART Pro users the ability to program keys to select Toyota and Lexus proximity vehicles when all keys lost. The solution also makes possible key programming to vehicles which would normally require dealer security (TIS) access, such as the very popular Corolla and RAV4 2018+. Component removal and or plugging into ECUs is not required. The key programming process is safe and very user friendly with all programming carried out via the OBD connector. The solution consists of 2 parts as listed.

Complete SECURITY SOLUTIONS

ADA SMART Pro Emulator for Toyota DST when All Keys Lost

- Used for when all proximity keys are lost
- Connects to the SMART Pro by way of USB
- Key data read from the vehicle by the SMART Pro is stored in the emulator
- The emulator becomes a master key
- Using the emulator the operator can program new proximity fobs to the vehicle

SD755650AD

New software programs proximity keys to select Toyota vehicles.

ADA SMART PRO Software Toyota 2022 ADS2328

- When all proximity keys are lost the use of the ADC2015 emulator is required
- If there is an existing proximity key the software will program spare keys
- Bypasses the requirement for dealer security access (TIS) where applicable
- Token usage differs depending on vehicle specifics (refer CarLab, MYKEYSPRO or updated SMART Pro)
- Category A software which can be purchased outright if required

SD756605AD

For additional information inclusive of applications lists please refer to MYKEYSPRO, CARLAB or the menu in an up-to-date SMART Pro device. **At the time of release the ADC2015 covers select DST128 proximity fobs only, with further coverage to follow**. The functionality of the emulator extends to other manufacturers such as late Subaru utilising 'H' bladed keys. But these are not yet present in our region.

NEW FROM BORG

NEW

Introducing the new Borg BL4409 rim fixed slam latch series locks. Perfect for gates, cupboards, storage areas or access points. Handy for all sorts of applications where a surface mounted latch is required.

The Marine Pro Series range of products has been developed specifically for marine applications. Manufactured to the highest standards using 316 stainless steel for internal components. It has undergone extensive testing to ensure that the coding chamber is resistant to salt water corrosion.

No longer is it necessary to remove the lock and tumblers, the code can be changed with the lock on the door.
